

Energy Performance Certificates

Energy Performance Certificates (EPCs) provide an indication of the energy efficiency of our homes, based on factors such as energy use, heating and insulation. The EPC rating ranges from A (most energy efficient) to G (least energy efficient) and helps us understand the current energy performance of our housing stock and where there may be opportunities to improve energy efficiency over time.

The chart below shows the proportion of our homes within each EPC rating category, from B to E.

EPC Ratings range from A, representing the highest energy efficiency to G, representing the lowest

Energy performance rating	Percentage of homes
A	0%
B	13%
C	58%
D	17%
E	12%
F	0%
G	0%
